Manual for installation of Trailer Cover Support Bars

Step 1:

Place the shoulder brackets on both sides of the trailer.
Make sure they are level and aligned with each other.
Mark the screw holes.
Drill pilot holes slightly smaller than the screws.

Step 2:

Use the provided screws to install the shoulder brackets.

Step 3:

Secure one barrel to one bracket using the bolt and nut.
Tighten firmly.

Step 4:

Slide one end of the triangular bar into the first barrel.
Insert the other end into the second barrel.

Step 5:

Install the second barrel, once again, ensuring the screws are properly tightened.

**Step 6:**

Use the centre barrels to position the bars evenly across the trailer.
Ensure the bars are straight and centred.

Step 7:

Once aligned, tighten the barrels with the flower-shaped screws.

**Step 8:**

Finally, screw the bolt and nut into their respective ends of the centre bars to finish the installation.
